- 2 Months free post-delivery support on eligible projects.

What We Offer

Website Development • Custom Software Development • AI & Automation Solutions • AI Chatbots • RAG Solutions • Application Modernization • Technology Upgrades • Data & Analytics • SEO-Ready Websites • Business Dashboards • Cloud & API Integrations • Support & Maintenance.

Project Delivery & Customer Policies

Project Engagement Policy

All projects begin with requirement discussions. Scope, deliverables, timelines, responsibilities and pricing are confirmed before development begins. Scope changes requested after approval may require additional effort, timeline adjustments and commercial review.

Delivery Process

Requirement Analysis → Planning → Design → Development → Testing → Deployment → Support.

Support Policy

Eligible projects include post-delivery support for bug fixes, project-related issue resolution and technical guidance. Support does not include unlimited feature development, third-party subscription costs or functionality outside approved scope.

Client Responsibilities

- Provide accurate business requirements.
- Supply content, approvals and feedback on time.
- Maintain ownership of third-party services and accounts.
- Review deliverables during agreed review periods.

Quality Standards

NLTS aims to deliver responsive, secure, scalable and performance-focused solutions using recognized engineering practices and maintainable architectures.

Technology Policy

Technology selection is based on project requirements, security needs, scalability expectations and long-term maintainability.

Privacy, Security, Refunds & Legal Policies

Privacy Policy Summary

NLTS may collect customer names, company information, contact details and project requirements for communication and service delivery purposes. Customer information is never sold or rented.

Security Policy

Depending on project scope, security controls may include secure authentication, server-side validation, protected business logic, environment variable protection, rate limiting, security headers, secure APIs and controlled access management. No digital system can guarantee complete immunity from cyber threats; controls are applied according to project requirements.

Refund Policy

Refund requests are reviewed according to project stage, completed work, incurred costs and agreed contractual terms. Completed work remains chargeable. Approved outcomes are confirmed in writing.

Terms & Conditions

Project-specific agreements govern deliverables, intellectual property, payment terms, licensing, timelines and responsibilities. These agreements take precedence over this summary document.

Disclaimer

NLTS does not guarantee specific search-engine rankings, business outcomes or third-party platform performance. Recommendations are provided based on available information and industry practices.
